

Dealing with Numbers and Trends

One-Day Workshop

Dealing with Numbers and Trends

Workshop Overview

Do you find describing numbers and statistics complicated in English? Do you struggle to describe trends and results accurately? Would you like to be able to be more confident with numerical reporting?

If you answered yes to any of the above questions this course is for you!

A key aspect of management and planning requires analysing and reporting statistics, results and financial information. This aspect often involves complex numerical information while other times it's necessary to communicate estimated and simplified data. On the other hand, it's vital to be able to understand statistics in a negotiation, for example.

'Dealing with Numbers and Trends' is made easy with this fast paced and engaging one-day workshop!

This hands-on workshop gives students an opportunity to not only learn some great new skills but also put them into practice through engaging group activities. You will learn how to communicate complex numbers and statistics and practice using key language to interpret trends and approximate results to make your message easier to understand and remember.

Requirements

The workshop is aimed at participants with a B1-C1 level of English.

No previous experience required.

We are flexible and deliver this workshop as a complete one-day workshop or two half-days.

Dealing with Numbers and Trends

Content and Learning Outcomes
